

## Spiritual Science

Spiritual Science... It has long been thought there must be a truly scientific understanding of how Spirit operates.

There are many who think acquiring this knowledge is either impossible or forbidden. The truth is, there is no knowledge that exists that should not be known. The only problem with the possession of any knowledge is the misuse of it.

Some of the findings derived from The Trinity Project

Disclaimer : No medical claims are made or implied, all "Healing" referred to is defined as "Spiritual Healing". Current understanding of the human physiology recognizes the existence of what is referred to as an "Energy System". This system could also be referred to as our "Spiritual Energy", this is the subject of discussion. The manner in which this Energy operates indicates specific laws of cause and effect and reproducibility, and could be termed as "Spiritual Physics".

Validation of direct influence of our "Energy System" on all other systems.

Validation of Healer's influence on Subjects at all levels.

Validation of direct reaction to external events and influences.

Validation of "Balancing" and "Alignment " procedures.

Validation of "Time" as a matter of perception and as a variable.

Validation of the existence of "Consciousness" at many levels in all things.

Validation of the "Interdimensional" nature of "Energy" and "Consciousness".

Validation of the "Multidimensional" nature of "Energy" and "Consciousness".

Validation of the human ability to perceive beyond the "Apparent Reality".

Validation of "Energetic Spiritual Energy Enhancement"

during "Healing Sessions".

Validation of the "Existence Of Spiritual Beings" and their presence.

Validation of the participation of "Spiritual Beings" in "Healing Sessions".

One conclusion drawn from these findings is our basic human physiology is extremely influenced and affected by our Perceptions and our Interconnections with All Things. The most important finding was an overwhelming confirmation of the actual existence of the normally imperceptible aspects of our Spiritual Nature. Given this understanding it is very easy to comprehend and explain the long recognized and accepted validity of the placebo effect. The findings in many instances were validated with actual EEG monitoring and Kirlian photography, many of the findings although subjective were in many instances validated by corroborative experiences and knowledge. Given the acceptance of any or all of these conclusions it should be very obvious that with complete knowledge, understanding and proper application of these aspects virtually anything becomes possible.

"Spiritual Physics" is a new terminology used by this researcher to help quantify spiritual understanding. The Laws, Physics and Science related to the reality and reasoning of how the Spiritual process operates
